Disposable Multipurpose Lab Spatulas

The LevGo Disposable Polypropylene Spatula is an autoclavable tool for spooning, scooping, scraping and stirring a variety of samples or chemicals. They are made of Virgin Food Grade Polypropylene, resistant to dilute acids and bases. Single use spatulas save time and water and remove the risk of spatula-caused cross-contamination. LevGo spatulas are widely used in commercial, university, diagnostic and pharmaceutical labs worldwide. They are also used by compounding pharmacists to produce customized medications.

Cat. No. - 17211

➤ **Description & Features**
Spoon/Scrape & Scoop

➤ **Technical Specifications**
210 mm, 8 1/4"

➤ **Pack of**
300 Pcs
